SUMMARY

Full Stack Developer proficient in the MERN stack (MongoDB, Express.js, React, Node.js), with a strong foundation in building responsive and dynamic web applications. Experienced in containerizing applications using Docker for streamlined development and deployment workflows. Passionate about exploring emerging technologies, with a keen interest in Web3 and Generative AI to drive innovation and future-ready development.

EDUCATION

Chandigarh University <i>B.E. Computer Science Engineering, Specialization in AI & ML (IBM)</i>	Punjab, India 2022 – 2026
DAV Public School <i>Intermediate, CBSE</i>	Surajpur, Panchkula, Haryana 2020 – 2022
DAV Public School <i>Matriculation, CBSE</i>	Surajpur, Panchkula, Haryana 2019 – 2020

EXPERIENCE(FREELANCE)

- [Link] **CorpValet** | *React, Stripe, Web3Forms, Express, Material UI, JavaScript* 2024
- CorpValet supports entrepreneurs in starting their businesses in the USA. I developed this website using Vite, React, Corus, Express, Material UI, and JavaScript. Web3Form API was implemented for secure form handling, and Stripe was integrated for seamless payment processing.
- [Link] **LiveVista** | *Html,Css,Wordpress* 2024
- LiveVista is an e-commerce platform specializing in pool products, serving customers in Vietnam. I built this website using a content management system (CMS), enabling efficient product management and user experience.
- [Link] **NatZest** | *Html,Css,Google Recaptcha Api WordPress* 2025
- Natzest offers support services for individuals and organizations aiming to manage their businesses efficiently. I developed this website using WordPress as the CMS. For advanced customization, I utilized HTML and CSS, and integrated Google reCAPTCHA for enhanced form security.

PROJECTS

- [Link] **Vanikriti** | *React,Firebase,Express Js, Node Js, GIS Mapping, Tailwind, Next Js* 2024
- VanKirti is a collaborative hackathon project focused on environmental sustainability through plantation methods. The tech stack includes Next.js, React, Express, Node.js, Firebase, GIS mapping, and the Google Maps API to visualize and manage plantation data.
- [Link] **Museum Ticket ChatBot** | *Html, Css, JavaScript* 2023
- This is a hackathon project where I designed and developed the frontend using HTML, CSS, and JavaScript. The system facilitates online ticket booking for museum visits, enhancing user accessibility and convenience.
- [Link] **Ztech** | *Html Css JavaScript* 2023
- ZTech is a hackathon project centered around healthcare innovation. I developed the frontend using HTML, CSS, and JavaScript. The website provides detailed information about stethoscope usage and manages customer data.

CERTIFICATIONS AND COURSE

[Link] Introduction to Generative AI for Data Analysis <i>Coursera,Microsoft</i>	Mar 2025
[Link] Oracle Cloud Infrastructure 2024 Generative AI Certified Professional <i>Certified by Oracle</i>	June 2024
[Link] Python Data Structures <i>Coursera, University of Michigan</i>	Nov 2023
[Link] Applied Machine Learning in Python <i>Coursera, University of Michigan</i>	Sept 2024
[Link] Using Python to Access Web Data <i>Coursera, University of Michigan</i>	Nov 2023

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML, CSS,Node Js
Machine Learning:Generative AI
Databases: Mongo DB
Cloud Technologies:Docker
Frameworks Library: React , Express Js,Tailwind
Other Skills: OOPs Concepts
